Middlesex | New Jersey | 908-307-8924 | anthonyjhelmstetter@outlook.com

EDUCATION

Kutztown University of Pennsylvania— Kutztown, PA

Bachelor of Science

September 2021 - May 2025

Major: Information Technology | GPA: 3.3

Kutztown University of Pennsylvania— Kutztown, PA

Master of Science

September 2025 - May 2027

Major: Information Technology

HONORS & AWARDS

Honors: PSAC Scholar Athlete

Awards: Outstanding Scholarship, Men's Cross Country/Track Scholarship

TECHNICAL SKILLS

Analysis: Visio, Tableau, Excel

Software Development: Python, C++, Visual Studio Code

Web Development: HTML, CSS, JavaScript, PHP, Flask, API Integration

Database Management: SQL, SQLite3

Project Management: Confluence, Jira, Scrum, Agile

Soft Skills: Problem Solving, Cross-team Collaboration, Teamwork, Communication, Initiative, Critical Thinking, Leadership

EXPERIENCE

EISAI, Nutley, New Jersey

June 2024 – August 2024

Enterprise Security & Compliance Analyst, Intern

- File Migration: Supported file migration team with documenting steps and configuration settings as well as assisting with the analysis to extract key findings
- User Asset Flow: Mapped out new process for U.S. locations to recover assets of terminated users and place them on hold
- Message Preservation: Explored/Highlighted options that would help identify, preserve and collect SMS/MMS text messaged on corporate-issued devices

Johnson & Johnson, Raritan, New Jersey

May 2023 – August 2023

Information Security & Risk Management, Intern

- Scrum Master: Successfully obtained my Professional Scrum Master 1 certification. Utilized this knowledge to help drive a team and keep them on track through 3 sprints while running various ceremonies. With each sprint containing 10 working days, I aided in the development of a month's worth of functional value being produced.
- Product Analyst: Collaborated closely with the Product Owner to translate emerging requirements and demands into comprehensive user stories. Iteratively refined these stories to ensure alignment with project objectives and stakeholders' needs.
- Okta Engineer: Demonstrated proficiency in leveraging Okta Workflows and pioneering their new beta technology OIG (Okta Identity Governance). Harnessed these beta APIs to orchestrate the Access Certification process which is offered through OIG. Which devised and executed audit campaigns aimed at evaluating users' statuses that we defined as inactive. Culminating in actions, including approvals and revoking users' access to resources, for the appropriate identified inactive users as per my stretch assignment.

PROJECT EXPERIENCE

Identity Governance Enterprise Work

May 2023 – August 2023

Product Analyst & Scrum Master

- Collaborated closely with the Product Owner and development team

- Analyze and refine incoming requirements, ensuring they met specifications and were translated into clear and actionable user stories, enhancing developer understanding
- Facilitated the understanding and adherence to the Scrum framework as the Scrum Master
- Effectively leading daily stand-ups and all Scrum ceremonies for three successful two-week sprints.

Okta Access Certification Flow

May 2023 – August 2023

Okta Engineer

- Rapidly learned and leveraged beta features of Okta Identity Governance and its beta APIs within a two-week timeframe to design and develop an Access Certification Flow.
- Provided managers with critical visibility into inactive user accounts over a defined period, enabling informed decisions regarding access approval or revocation, thereby enhancing security

Confluence Homepage Migration

May 2023 – August 2023

Team Member

- As part of the External Identity and Access Management team, managed the content migration within our Confluence workspace, evaluating and determining the disposition of files (keep, delete, or archive) to optimize the platform.
- Revamped the layout and design of key Confluence pages to establish a consistent and clean user interface, improving navigation and information accessibility for the team.

User Asset Preservation Flow

June 2024 – August 2024

Team Member

- As part of the Security Compliance and Architecture group, I designed and implemented an end-to-end workflow within ServiceNow to manage the preservation of user assets upon employee termination, ensuring full transparency for relevant stakeholders.
- This ServiceNow flow enabled tracking of terminated employee device(s).

Senior Seminar: Web-based Phishing Campaign Creator

September 2024 – May 2025

Team Lead & Developer

- As Team Lead and Developer, I leveraged my Scrum Master experience to establish a smooth software development process by outlining the Scrum framework and integrating key tools including MailGun, PythonAnywhere, and NameCheap. I also developed the core functionality, ensuring project completion by the target date.
